Birth Anniversary of Savitribai Phule

Minutes

Woman Empowerment Event was conducted in **Pragnya College of Management and Computer Studies** and the guest lecture was arranged by the Prof. Fazilat Jagot. She was the Chief guest of the event.

Savitribai Phule was a teacher, Indian social reformer, educationalist, and poet from Maharashtra. Along with her husband, Jyotiba Phule in Maharashtra, she played a vital role in improving women's rights in India. She is considered to be the pioneer of India's feminist movement. Savitribai and Jyotiba together founded one of the early modern Indian girls' school in Pune, at Bhidewada in 1848. She strived to abolish discrimination and unfair treatment of people on the basis of caste and gender.

About Women Empowerment.

Women empowerment implies the ability in women to take decisions with regard to their life and work and giving equal rights to them in all spheres like: personal, social, economic, political, legal and so on. We are living in an age of women empowerment where Women are working shoulder to shoulder with men. A woman also manages to balance between their commitment to their profession as well as their home and family. They are playing multiple roles - at home as a mother, daughter, sister, and wife and at working place as professionals with remarkable simplicity and compatibility.

Women empowerment is essential for the betterment of any country's future as they play dual responsibilities of managing their families while simultaneously juggling to earn to contribute in fulfilling their family needs. No one can ever ignore the importance of the role of a mother, sister, or a daughter in their families. At the same time, women have also established themselves as equal contributors in managing the financial requirements of their homes. On international level as well, women have successfully created their unbeatable position, but they are just a handful in comparison to their counterparts.

Tree Plantation Activity Report

Date: 29/07/2022

Minutes

Introduction:

Continuing with its tradition of preserving the environment and having ecofriendly activities, the "Tree Plantation Event" was conducted on the campus of *Pragya College of Management & Computer Studies* on world nature conservation day, 28th July 2022. Understand the importance of nature for our existence and conserve the nature in all manner, is our moral responsibility. It's not too hard to believe that without trees we, humans would not exist on this beautiful planet. Also, we have felt the change of purity in nature and reduction in pollution effect during this pandemic situation. While the latest technology has provided us with many comforts, the consequent urbanization and industrialization also have some undesirable side effects; Global Warming is one of those. This event is a positive step towards achieving a healthy environment and to reconnect humans to nature and foster environmental stewardship.

Report on Special lecture on Cyber Safety on Social Media

By

SI-Ramdas Toradmal

Date: 21/01/2022

Minutes

Internet safety or **online safety** or **cyber safety** and **E-Safety** is trying to be safe on the internet and is the act of maximizing a user's awareness of personal safety and security risks to private information and property associated with using the internet, and the self-protection from computer crime.

As the number of internet users continues to grow worldwide, internets, governments, and organizations have expressed concerns about the safety of children and teenagers using the Internet.

Cyber threats in social networking websites

A cyber threat refers to a malicious act that seeks to damage data, steal information, or disrupt digital life in general. Cyber threats can be unintentional and intentional, targeted, or non-targeted, and they can come from several sources, including hackers, disgruntled employees, and contractors working within an organization. We categorize threats into 2 main groups: privacy-related threats and traditional network threats.

Cyberstalking

Cyberstalking means the use of social media, e-mail, or other telecommunication technologies to threaten, harass, or stalk users. So, cyberstalking can be seen as an extension of the physical form of stalking. Cyberstalkers may send unsolicited e-mails, including hate, obscene or threatening mail, which presents a range of emotional and psychological damage for the victim. According to Norton's "Cyber Safety Insights 2021" report, 11% of consumers have deleted their social media account to protect their online privacy.
